

# TIQUILA Fast Facts

as of June 1, 2025

Lockheed Martin Skunk Works® is delivering capability to the UK Ministry of Defense (UK MoD) on the TIQUILA program, focused on leveraging its extensive expertise in Uncrewed Aerial Solutions (UAS) to provide advanced Intelligence, Surveillance, Target Acquisition, and Reconnaissance solutions. Our baseline includes two initial platforms, with a clear path for future expansion and spiral development.

The TIQUILA Programme utilizes a novel Capability Integration Cycle (CIC) initiative to transform a traditional fixed-scope procurement into a long-term service based contract of continual evolution of capability; ensuring an enduring UAS capability for the UK MoD.

## Programme Milestones

## Programmatic Facts

250+ Air vehicles delivered to the UK MoD

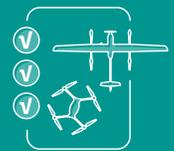

Initial training provided early to increase platform awareness to operators

The TIQUILA team is led by a growing UK-based team

Leverages SEA and SMEUNITE to deliver future capability and drive UK industrial participation and exportability

Operational training rollout underway in the UK

## Economic Impact

TIQUILA has a growing number of UK suppliers.

TIQUILA is the first programme to successfully operate within the UK MoD's Social Value framework.

SEA fosters a collaborative ecosystem between academia, subject matter experts, and large primes.

New capability competitions are underway ahead of schedule. 47 companies and counting have begun or completed the SEA onboarding process

As the prime system integrator, Lockheed Martin fosters industrial participation with industry partners to drive technology and knowledge transfer from within the UK.
